

第1回 NCNP国際セミナー

SPECIAL LECTURE: 「Genetics of multiple sclerosis: more like Schrödinger's cat than Mendel's peas」

(Professor Stephen James Sawcer

Neurological Genetics. University of Cambridge.

Personal chair funded by the University of Cambridge)

Professor Stephen Sawcer is internationally recognized for his pioneering research into the genetic and immunological mechanisms underlying multiple sclerosis (MS). His landmark study, “Genetic risk and a primary role for cell-mediated immune mechanisms in multiple sclerosis” (Nature, 2011), has greatly advanced our understanding of MS pathogenesis. With over three decades of clinical and academic experience, Professor Sawcer has led major international collaborations, identifying key genetic risk factors and contributing to the development of personalized medicine approaches for MS. His recent work continues to shape the future of MS research and therapy. We look forward to your participation in this unique opportunity to engage with one of the world's leading experts in the field. Date, time, and registration details will follow. Please join us for this distinguished event!

日時: 2025年6月20日(金) 16:30～17:30

**場所: 国立精神・神経医療研究センター
中央館(管理棟)3F コスモホール**
