# 2nd First Author's Seminar

## 神経科学理論からロボット知能

# From Brain Theory To Embodied Intelligence

**NOVEMBER. 11. 2026**

**16:00-**

**Institute Bldg III, Seminar room**

**This seminar Features researchers who have published as first authors in high-impact journals, discussing their research, the path to publication, and their future outlook.**

## Hayato Idei

Department of Information Medicine, National Institute of Neuroscience, National Center of Neurology and Psychiatry (NCNP),

Predictive processing as a scalable computational principle for embodied multitask intelligence

Science Advances 2026 Aug 14;12(33):eaed7511.
